

Karnak 19 Ultra -

Instant Repair

Directions for use:

All surfaces to be treated must be free of all dust, dirt, oil, grease, rust, loose paint, or other foreign matter. Open tin apply product to desired area of vulnerability.

(Tube) Cut spout to desired bead size and then puncture inner seal below spout with a long nail or screwdriver. Karnak 19 Ultra should be applied using a standard open cradle caulking gun.

To clean tools, use either paint thinner or mineral spirits, taking necessary precautions when handling combustible material. To clean hands, use a waterless hand cleaner.

Coverage:

Apply at desired thickness. Standard application for repair is 1kg/m². For permanent repair 1kg/m², reinforcement tape + 1kg/m².

Uses:

Cracks, Tears, Rips, Cracked Copings, Flashings, Foundation Walls, Chimneys, Parapet Walls, Gutters, Roof Seams, Around Skylights, Asphalt and Metal Roofs, APP and SBS Modified Bitumen Membranes.

Useful Info:

Wear suitable gloves and eye protection.

Karnak 19 Ultra

Karnak 19 Ultra is the next generation of permanent roofing Repair solutions. Scientifically compounded with a selection of rubber reinforced asphalt, mineral fibres, and refined solvents. Karnak 19 Ultra provides a durable elastomeric coating of great strength, excellent adhesion and high resistance to watering and weathering. Karnak 19 Ultra is composed of special chemical ingredients which give it a unique water displacement quality allowing for wet or dry application.

Karnak 19 Ultra dries to a tough, flexible, waterproof and corrosion proof rubber coating which gives maximum protection and excellent performance over wide ranges of temperature and weather conditions.

Karnak 19 Ultra should be applied using a trowel for best results. To clean tools, use either paint thinner or mineral spirits, taking necessary precautions when handling combustible material. To clean hands, use a waterless hand cleaner.

FIRST AID

In case of contact with eyes, immediately flush eyes with lots of running water for 15 minutes, lifting the upper and lower eyelids occasionally. Get medical attention immediately.

In case of contact with skin, immediately wash skin with lots of soap and water. Get medical attention if irritation persists after washing. If swallowed, contact the Poison Control Centre. Get medical attention immediately.

The above suggested recommendations for use of Karnak products are predicated on tests believed to be reliable. However, since such application and use is beyond our control we do not guarantee the results to be obtained.
