

RAPID WATERPROOFING SOLUTIONS

Rapid Curing

Seamless Waterproofing

RapidRoof is LRS' unique, high performance, rapid curing, cold liquid applied range of waterproofing systems. With a typical curing time of 20 minutes our Rapid Range of products are suitable for year round application. Applied by brush or roller, RapidRoof is one of the fastest and most cost effective waterproofing options for both commercial and residential projects.

ROOFS – FLOORS – BALCONIES – WALLS

SUITABLE ONTO MOST SURFACES

RapidRoof is designed so that it can be applied directly onto most surfaces without the need for primer. This means that it can be incorporated in to the building of a new roof; applied onto OSB3 boards or alternatively used to overcoat existing, old or failed membranes including; felt, asphalt, metal, GRP etc*, eliminating the need for stripping the roof and disturbing the substrate, saving time and money whilst limiting disruption on site.

LIQUID APPLICATION

RapidRoof is a 2-component system which is simple to apply and due to its liquid application and versatility to adhere to most surfaces, RapidRoof will self terminate, eliminating the requirement for flashings, new trims and expensive detailing. Its fully bonded application prevents tracking of water and its' seamless finish eliminates the risk inherent in jointed systems.

NO CARRIER REQUIRED

Unlike most liquid applied systems RapidRoof is designed to be applied without a reinforment carrier which makes it more simple, faster and less complicated to apply, creating a smoother finish without voids or tenting. With over 200% elasticity RapidRoof is tough, yet flexible enough to deal with most roof movement unlike rigid systems. The RapidRoof range comes with our manufacture's product guarantee of up to 15 years, is UV stable and typically cures within 20 minutes.

RAPIDROOF will cure at low temperatures reducing down time

Rapid Application Systems

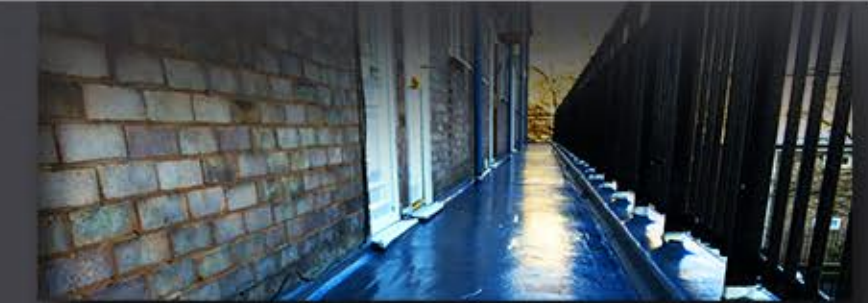

Apply up to 400m² Per Day

With continued exposure to flowing and standing water, gutters are one of the biggest causes of failed roof systems. Given that RapidGutter is cold liquid applied, it provides a flexible solution to all gutter shapes and sizes. Its rapid application and fast curing features reduces the chance of wash off during application – the system is typically showerproof in 20 minutes. Its high level of flexibility allows for normal structural movement and its tough finish provides long lasting waterproofing, eliminating the costly and disruptive exercise of replacing or continual patch repairing. RapidGutter is a long-term gutter recoating solution with guarantee options of up to 15 years.

Specifically formulated to refurbish corroding and failing metal sheeting RapidEdge provides a cost effective, long lasting, rapid application option for refurbishing old roofs, eliminating further corrosion thus extending the life of the roof with minimal disruption. RapidEdge is applied by brush or roller and is guaranteed for 10 years.

Premixed with an anti-skid aggregate, RapidDeck provides all the features of RapidRoof with the added benefits of an exceptionally hard wearing topcoat designed to protect the substrate whilst simultaneously reducing the risk of skidding. With a variety of finishes available this range includes protection for all types of trafficked surfaces including footpaths, car parks, ramps, balconies, terraces and factory floors. A rapid curing flooring solution for both domestic and commercial applications, designed for the toughest environments RapidDeck is guaranteed for up to 10 years.

KEY FEATURES:

- Cure time: Typical 20 min
- Cures down to 0°
- Elasticity: up to 200%
- Seamless
- Fully bonded
- Cold applied

Suitable for: felt, asphalt, metal, OSB3, Asbestos, concrete and many more..

Available **15** Years
GUARANTEE

WHO ARE LRS?

LRS (Originally Liquid Rubber) are manufacturers of high performance waterproofing systems. We provide our clients with both material supply and technical support across a range of liquid applied coatings. Our range of products include waterproof and protective coatings for almost all surfaces including roofs, floors, walls and foundations. Our systems are designed for rapid application and suitable for both new build and refurbishment. Our range includes products for roofing, car parks, walkways, tanking, anti-graffiti, moisture elimination and corrosion protection. For a full range of our products or to speak with one of our technical team either visit..

WHY USE LIQUID APPLIED SYSTEMS?

We focus on Liquid Applied products as we believe these provide the most cost effective waterproofing and protective membranes on the market. These systems allow flexibility in application for even the most detailed of roofs and their rate of application reduces both time and disruption on site. Furthermore with the increasing pressure on projects to eliminate site waste and reduce environmental impact the very nature of liquid systems means that waste is reduced to an absolute minimum.

RAPIDROOF RANGE

Our RapidRoof range which includes; RapidRoof, RapidDeck, RapidGutter and RapidEdge is designed to provide long lasting, tough, protective waterproofing and anti-skid coatings. Its special formula means that unlike most other systems Rapidroof can be applied directly to most surfaces without the requirement for primer including but not limited to OSB3*, old felt, asphalt, metal, GRP, (concrete & masonry with primer). To maximise time on site the Rapidroof range is designed to cure in an average time of 20 minutes down to temperatures of 0 degrees.

PRODUCT GUARANTEE

We offer a varying range of product guarantees dependant on application and project type ranging from 5 – 15 years.

TECHNICAL SUPPORT AND SPECIFICATIONS

Our technical support team cover the entire UK and are available on the phone or for site specific meetings by contacting our offices on 01948 841 877 between 9am-5pm Monday to Friday. We can assist with training, general enquiries or site specific specifications to ensure you receive the right solution for your waterproofing requirements. Approved contractor training also available.
