

## RapidClean - Salt & Efflorescence Neutraliser

### Directions for use:

Try a small test area to ensure the desired results. Shake container well. Dilute with water as follows, depending on degree of contamination, 1:1 high, 1:10 medium, 1:50 light. Apply with brush or sprayer. Allow the product to act for 5-30 minutes (time required varies dependent on size of the laitance and the thickness of material deposits being removed).

Thoroughly rinse the surface with water. Mask off surfaces not intended to be treated. Once cleaned it is recommended surfaces are protected with RapidGuard Multi-Surface Protector. Clean tools and equipment with water immediately after use.

### Uses:

All surfaces: metal, glass, rubber, paints, etc.

### Coverage:

Values for 1 Litre: 4-10m<sup>2</sup>

Use on metal (including steel and aluminum), glass, rubber and gloss paints, without changing appearance. Ideal for mineral substrates and does not change the surface porosity.

### Caution:

Not to be diluted or mixed with another product. Not to be applied to organic, metallic or non-porous surfaces. Not to be applied when likelihood of rain forecast within 12 hours following application or when air or surface temperatures below 5°C. Store product in dry conditions temperatures above 5°C.

### Useful Info:

Powerful and fast acting remover. Non-corrosive, non-irritant & water-borne. Suitable for floors and walls, exterior and interior use.

## RapidClean

**Powerful concentrate remover that does not require neutralisation after use. Removes cement, concrete and mineral deposits on fragile substrates.**

### **Health & Safety**
